Note: the closure of the Moscow Exchange ("MOEX") on 25 February 2022, which remained in effect as of the date of this factsheet, has resulted in stale pricing of MOEX-listed securities in the benchmark. The benchmark therefore does not reflect the sharp fall in the market price of Russian companies after MOEX' closure. As the Fund's investment in Russian companies is exclusively through Global Depositary Receipts ("GDRs"), American Depositary Receipts ("ADRs") or London-listed securities, which are not in the benchmark, there is a mismatch between the performance of the Fund and the benchmark as of the date of this factsheet. With the removal of all Russian securities from the benchmark in March 2022, we expect this performance divergence to reverse.
